Accelerator Completes Plug and Play offices at Think Park

A Fully Fitted Workspace Upgraded with Enterprise-Grade Connectivity

Think Park comprises three contemporary, self-contained office buildings set around a landscaped central feature, creating a calm and sophisticated working environment in Manchester.

Accelerator was hired to work with the Facilities Manager to ensure the building management systems, access control, CCTV and wi-fi for all 3 buildings were operating at high speed and safely.

Transforming Think Park: Eliminating IT Roadblocks for a Smarter Future

Previously the buildings were occupied by a bank. They had a surplus of mini networks for different functions within each of the 3 buildings. It was an overly complicated set-up, which we identified at the site audit prior to the project kick off.

Reliable connectivity became essential to maintaining the site's competitive advantage, ensuring that incoming tenants could operate immediately without network-related delays or technical remediation.

Aileen Delea from Promise FM was our client. "Working with Accelerator is always stress free. I can outsource major IT infrastructure projects to them and know I will get a fast turnaround and constant updates on the project progress".

Accelerator: Transforming Think Park's Digital Infrastructure

Accelerator delivered a full network modernisation, replacing end-of-life systems and stabilising inconsistent Wi-Fi performance across the estate.

Key Achievements by Accelerator

- **Installed a brand-new, secure network infrastructure**
  Replacing legacy equipment and introducing modern, scalable hardware.
- **Resolved long-standing intermittent Wi-Fi issues**
  Ensuring seamless coverage and predictable performance throughout the three management offices on each facility.
- **Delivered a more stable, resilient network**
  Providing reliable connectivity for hybrid meetings, video calls, and cloud-based systems.
- **Introduced enhanced cybersecurity**
  Protecting the building management with modern security standards and ongoing monitoring.
- **Reduced operational costs**
  Offering Think Park a solution that is not only more robust, but more cost-efficient. We were able to reduce their overheads making the site easier to manage with one invoice for all services, on a quarterly basis.
- **Ongoing support**
  Accelerator now provides Think Park with Accelerator Care – our bespoke support package to ensure the site's connectivity remains continuously strong and future-ready.

The Result: A True Plug-and-Play Offering

Accelerator's upgrades ensures that new occupiers can move in and start working immediately with enterprise-grade connectivity ready from day one.

Think Park now delivers:

- Zero-setup, ready-to-go IT connectivity
- Secure, building-wide Wi-Fi
- Reliable bandwidth for video conferencing
- Robust infrastructure for modern digital operations

We work with the leading managing agents and commercial property building managers to improve their connectivity throughout the UK. If you would like Accelerator to assess your current set up, we offer a free IT review. Let's connect.
